

Name: Andrew B. Coral
Program-Section: BSIT 3-2

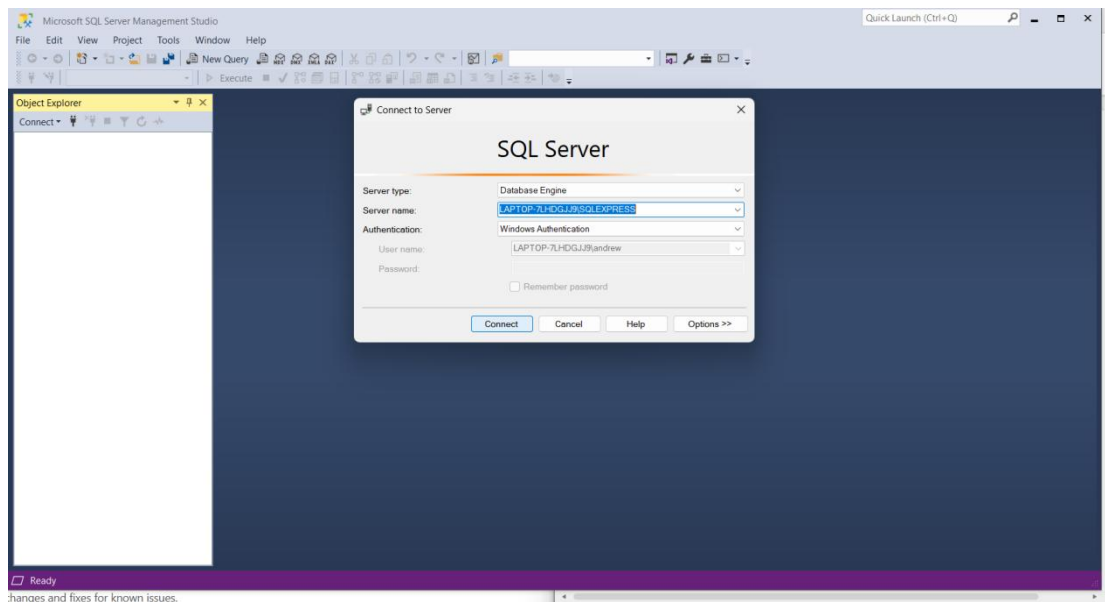

Date: September 8, 2025
Course: Database Administration

Laboratory Exercise

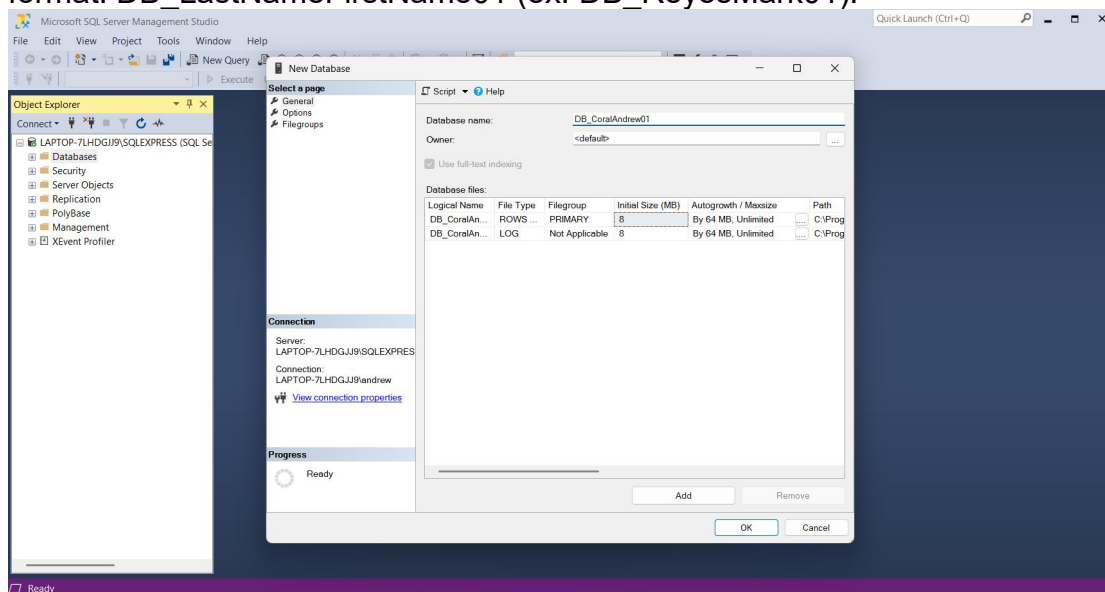

Database Design Using SSMS

Procedures:

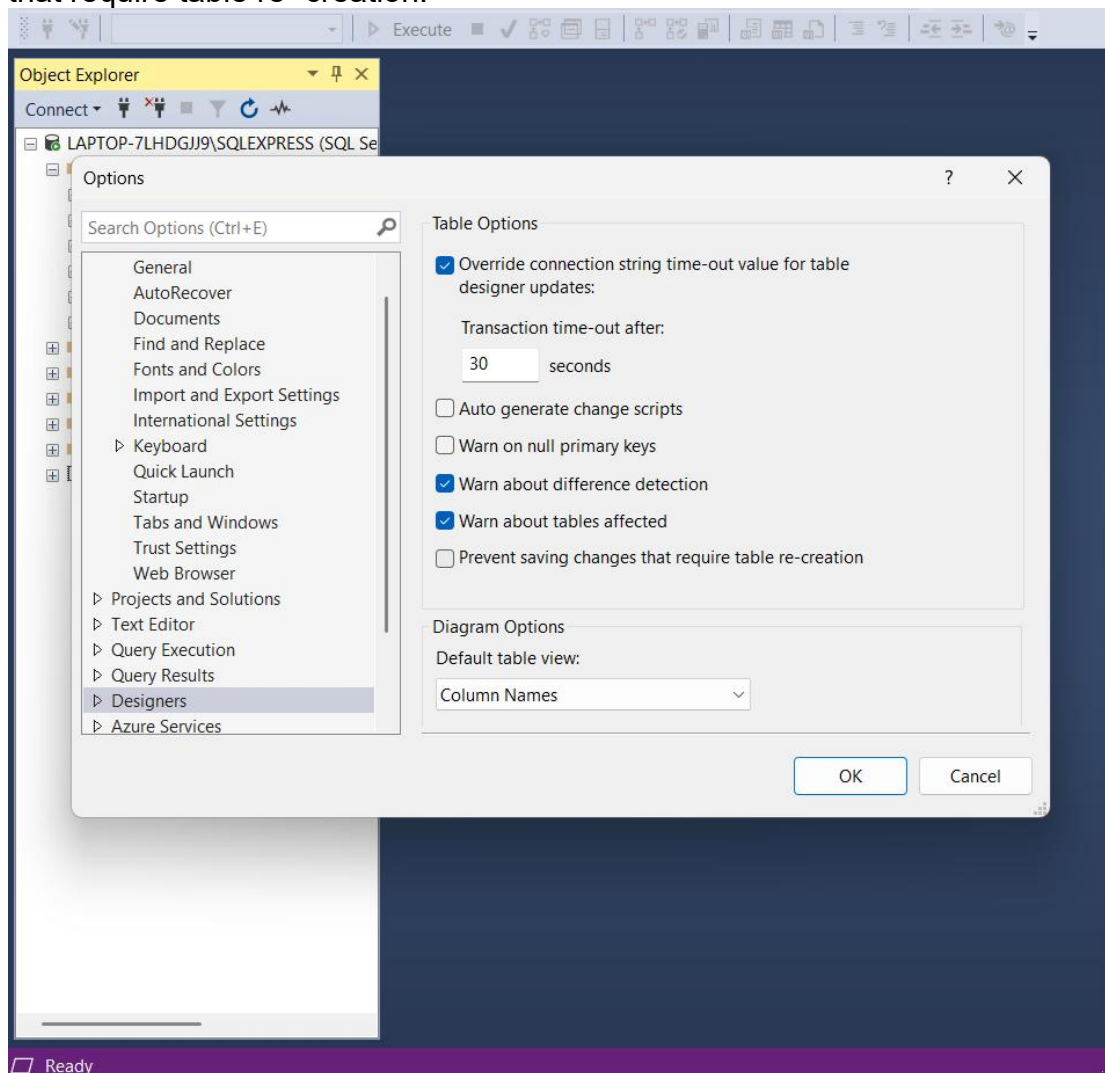

1. Open SQL Microsoft SQL Management Studio.
2. In the Server name box, leave the default server name, the computer name.

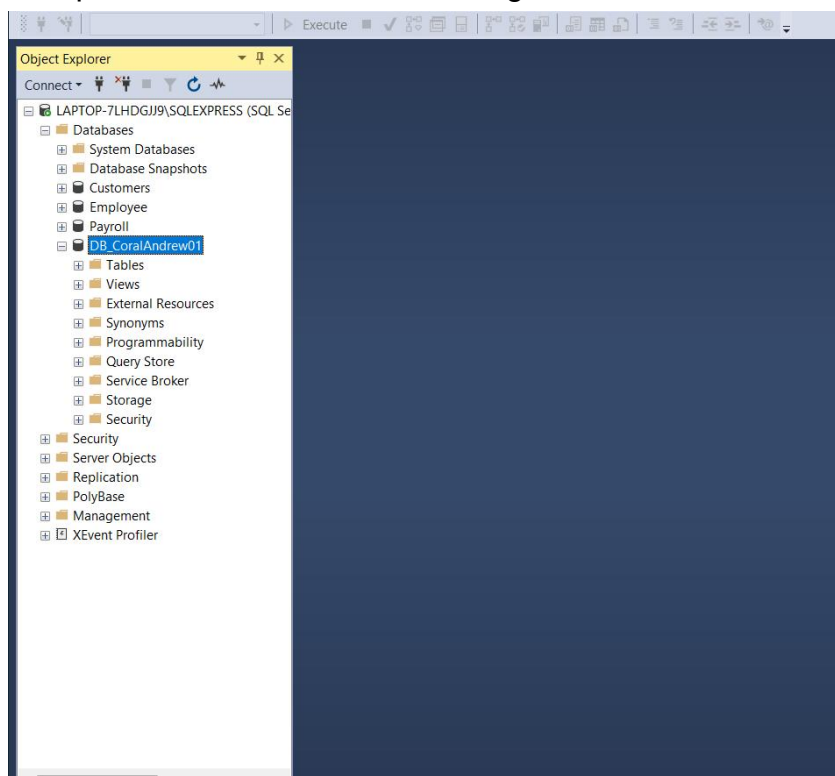

3. Right-click on the database folder and create a new database named in this format: DB_LastNameFirstName01 (ex. DB_ReyesMark01).

4. Go to Tools > Options > Designers then uncheck Prevent saving changes that require table re-creation.

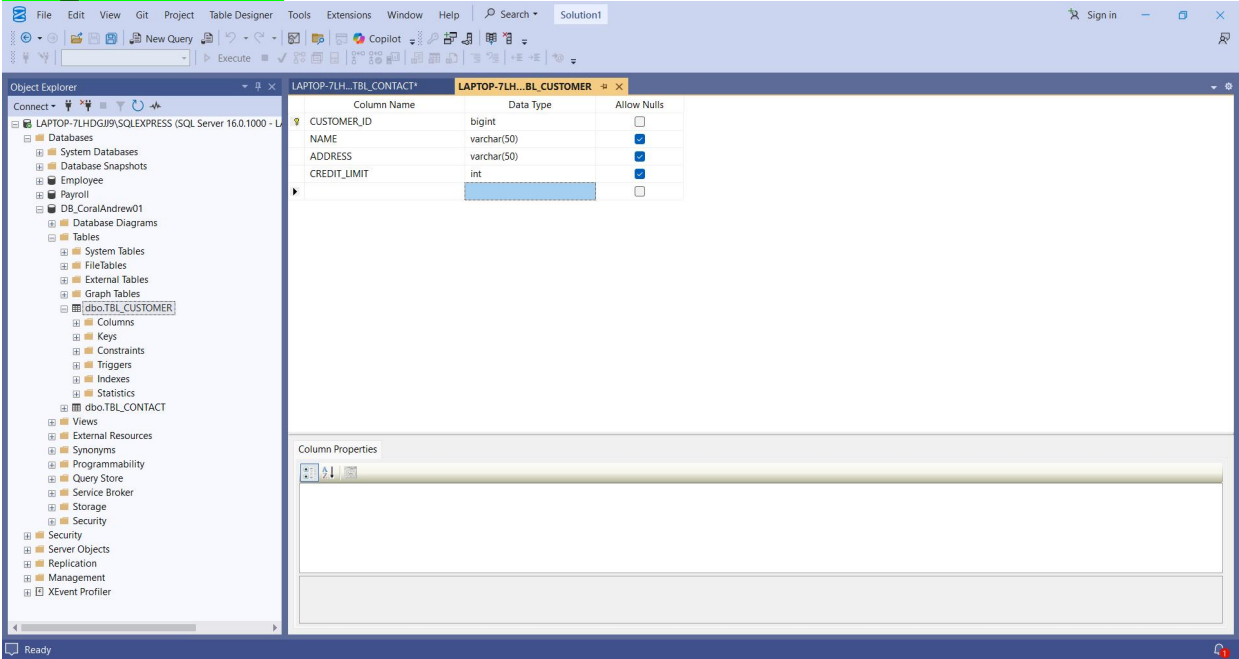

5. Expand the Database folder and go to the database that you created.

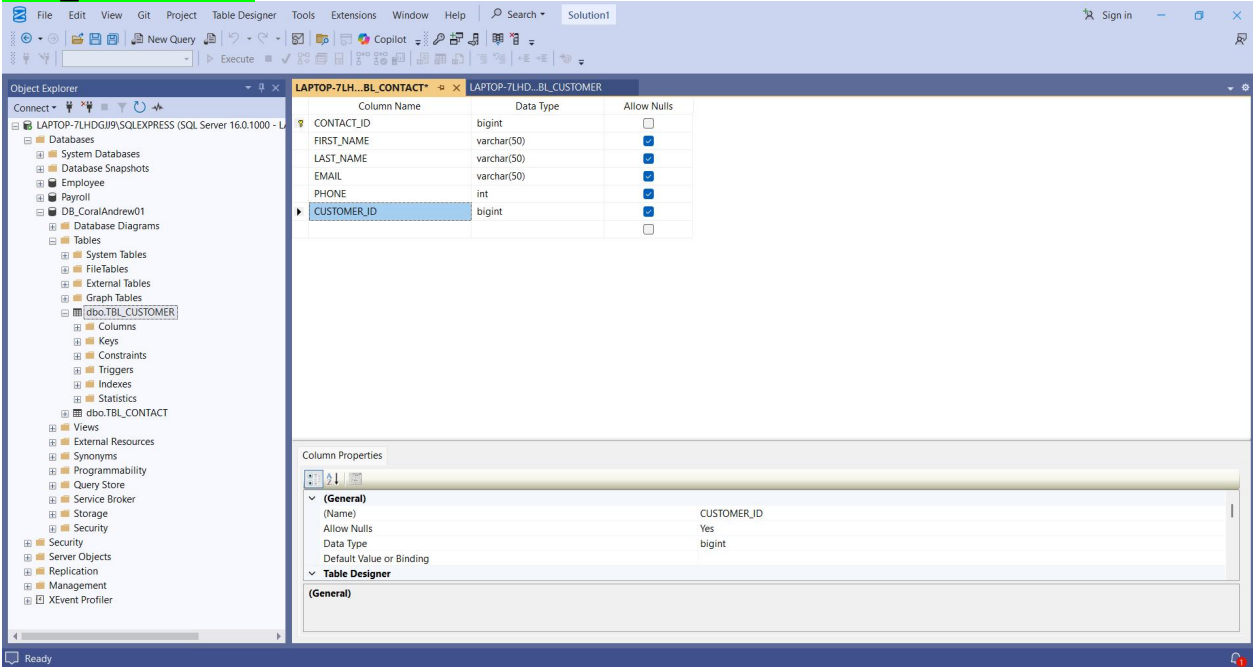

6. Right-click on Table and create two (2) tables. Refer to Table 1 for the tables' attributes and Figure 3 for setting the primary key.

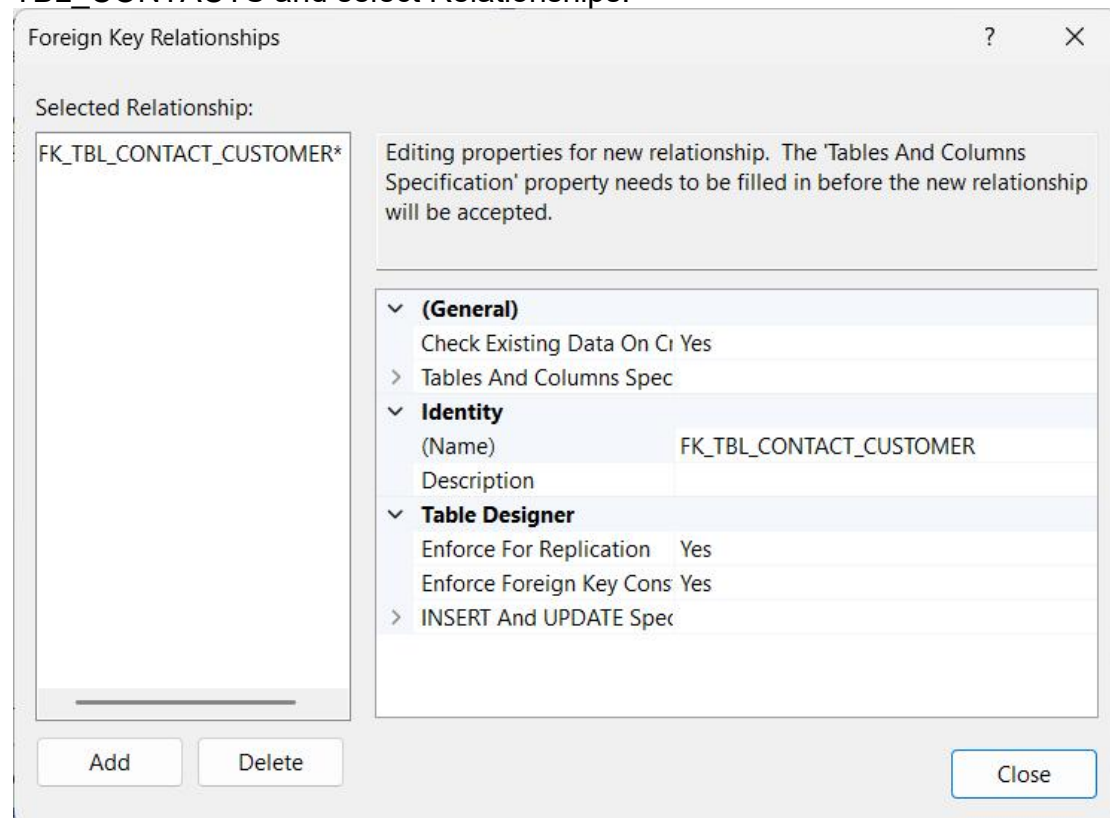

TBL_CUSTOMERS

TBL_CONTACTS

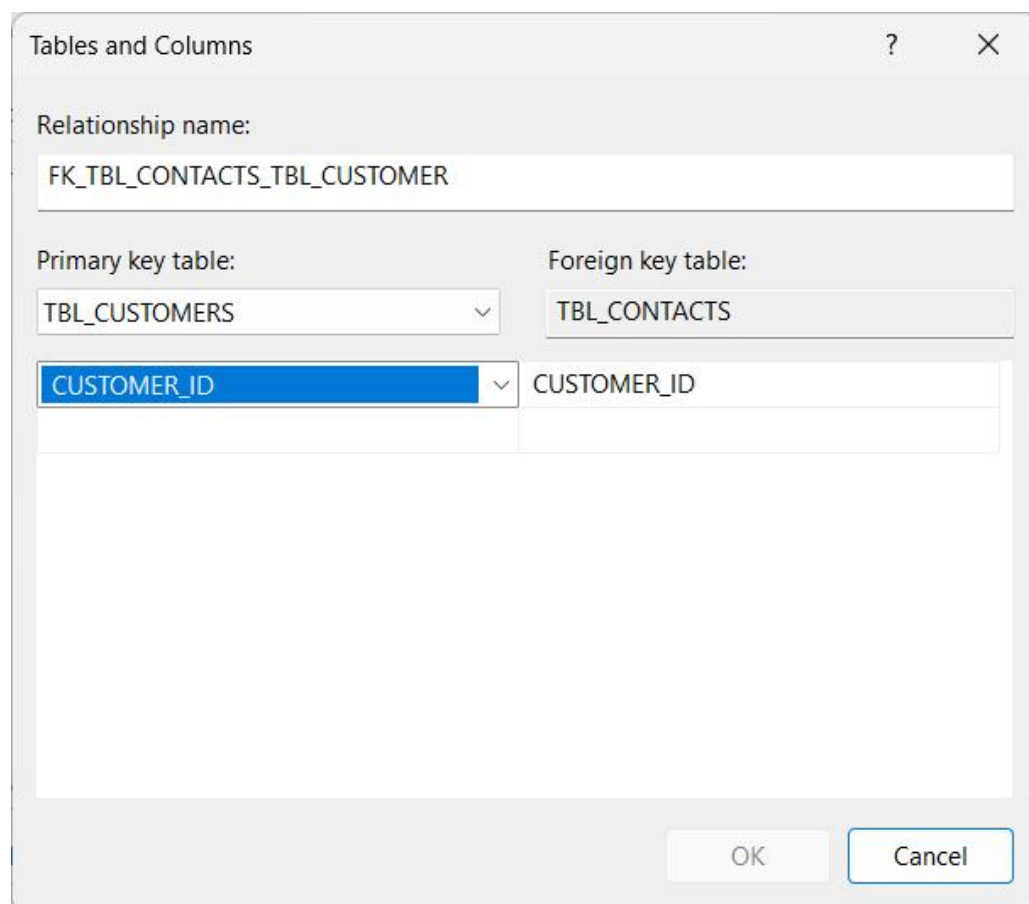

7. Set the foreign key for the table TBL_CONTACTS. Right-click on the table TBL_CONTACTS and select Relationships.

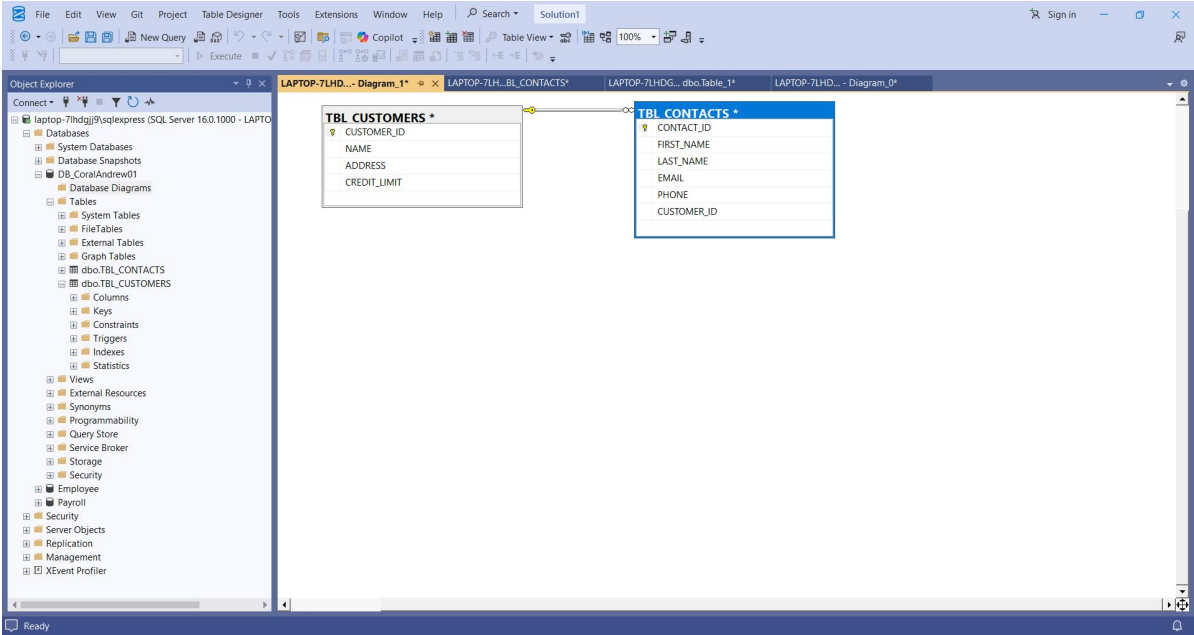

The 'Foreign Key Relationships' dialog box is shown. On the left, under 'Selected Relationship:', there is a list containing 'FK_TBL_CONTACT_CUSTOMER*'. On the right, a message states: 'Editing properties for new relationship. The 'Tables And Columns Specification' property needs to be filled in before the new relationship will be accepted.' Below this message are three expandable sections: '(General)' with 'Check Existing Data On Cr Yes' and 'Tables And Columns Spec'; 'Identity' with '(Name)' set to 'FK_TBL_CONTACT_CUSTOMER' and an empty 'Description' field; and 'Table Designer' with 'Enforce For Replication' set to 'Yes', 'Enforce Foreign Key Cons' set to 'Yes', and an expandable 'INSERT And UPDATE Spec' section. At the bottom are 'Add', 'Delete', and 'Close' buttons.

8. On the Tables and Columns Specification, click the button and select the column named CUSTOMER_ID of TBL_CUSTOMERS and TBL_CONTACT. Set the Relationship name to FK_CUSTOMER_CONTACT.

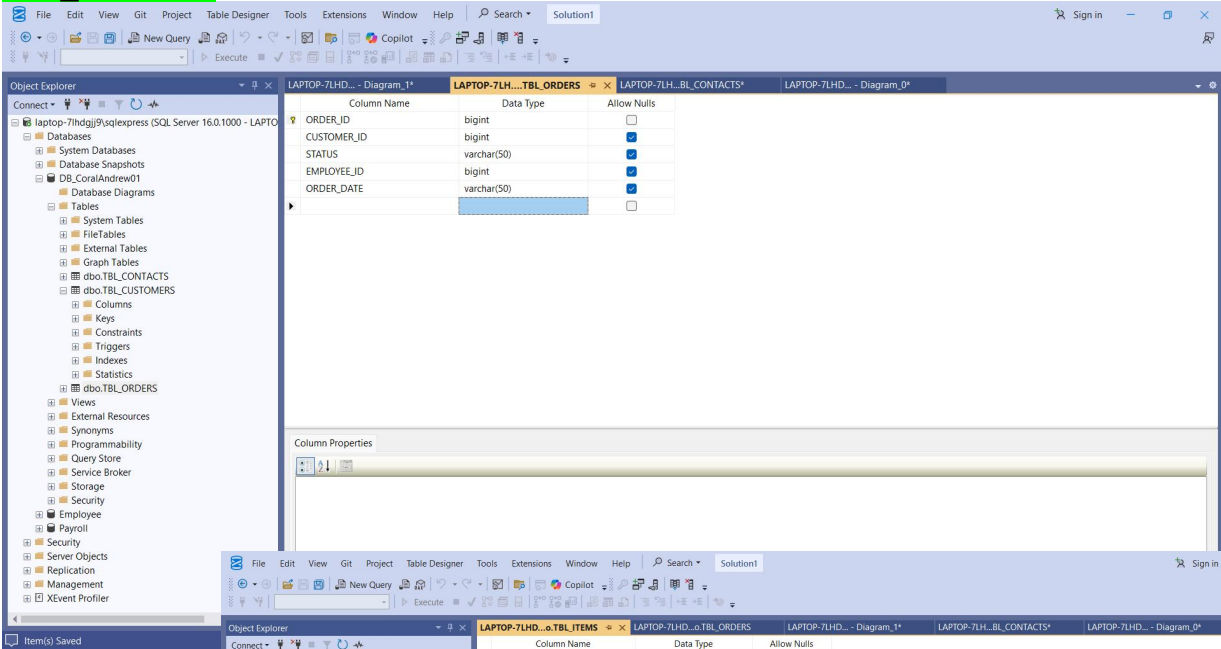

The 'Tables and Columns' dialog box is shown. The 'Relationship name:' field contains 'FK_TBL_CONTACTS_TBL_CUSTOMER'. Below this are two columns of dropdown menus. The first column, 'Primary key table:', has 'TBL_CUSTOMERS' selected, and the second column, 'Foreign key table:', has 'TBL_CONTACTS' selected. Under 'TBL_CUSTOMERS', 'CUSTOMER_ID' is selected. Under 'TBL_CONTACTS', 'CUSTOMER_ID' is also selected. At the bottom are 'OK' and 'Cancel' buttons.

9. Right click the Database Diagram folder. Create a new database diagram and all the tables.

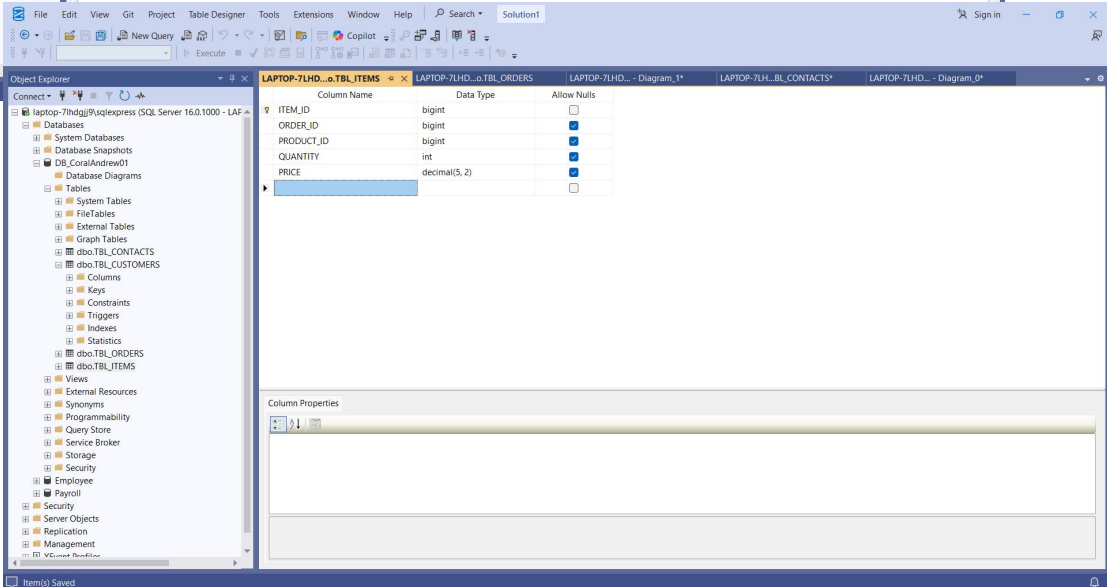

10 to 13.

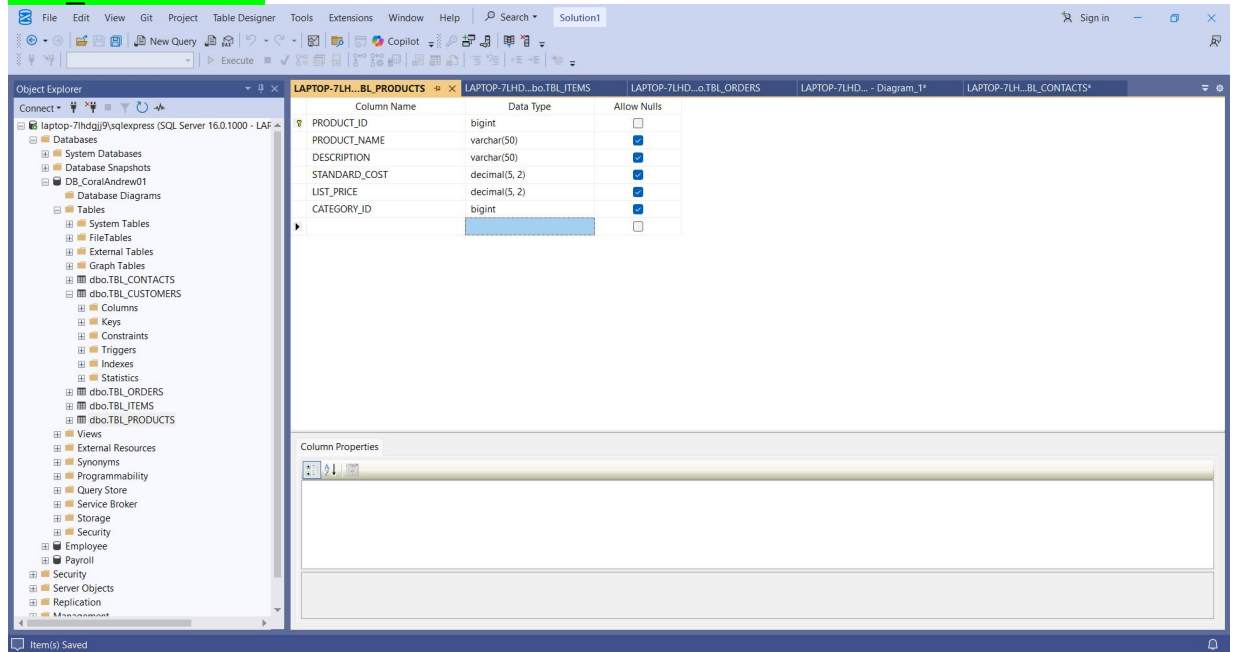

TBL_ORDERS

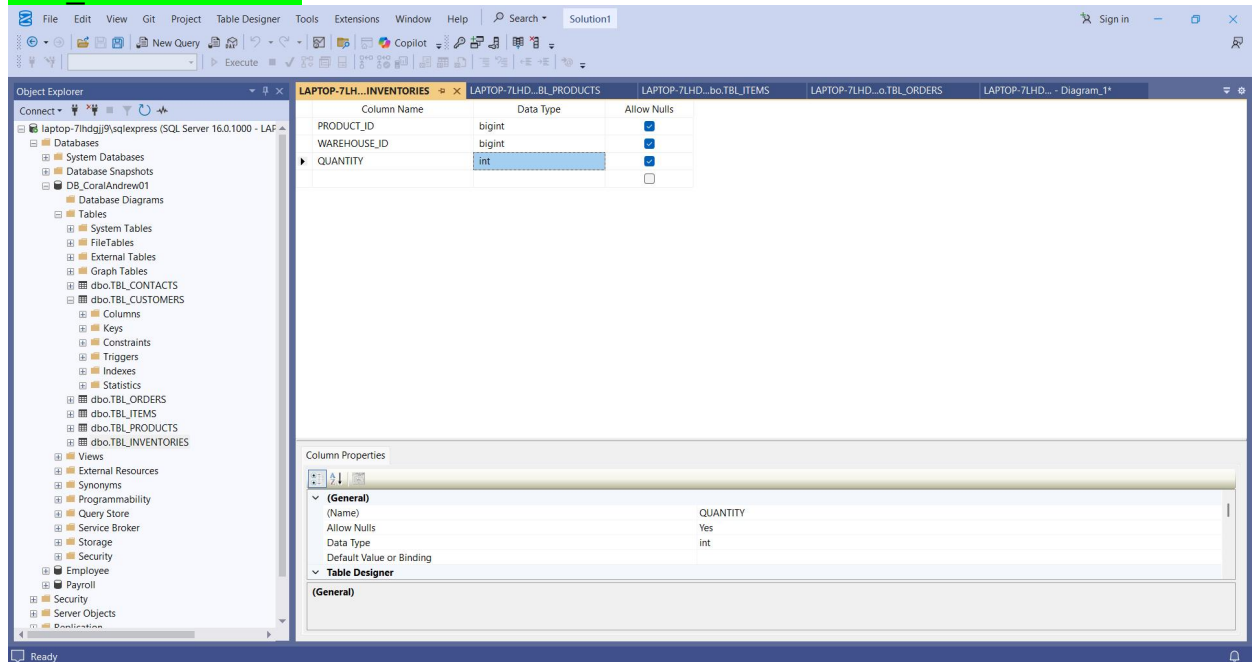

TBL_ITEMS

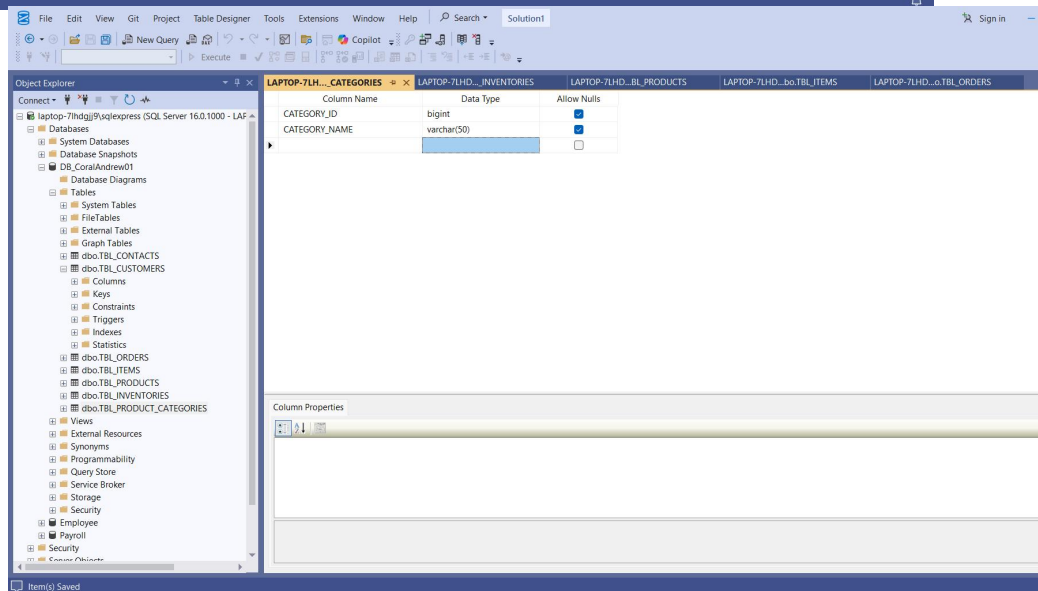

TBL_PRODUCTS

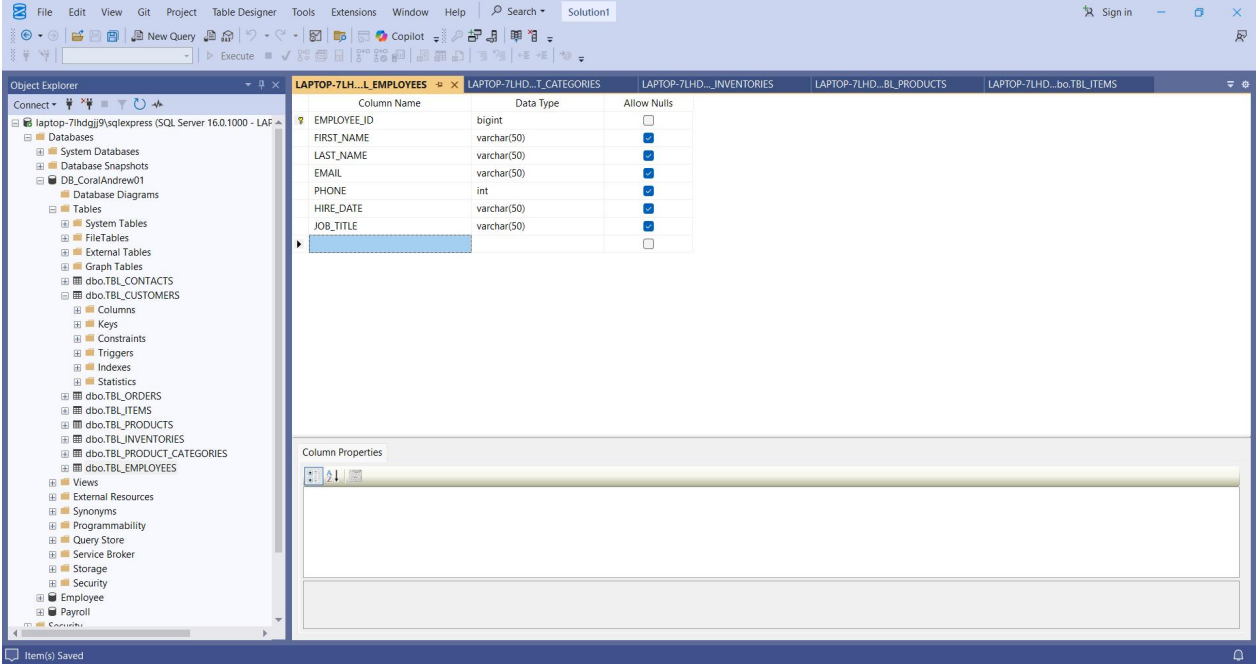

TBL_INVENTORIES

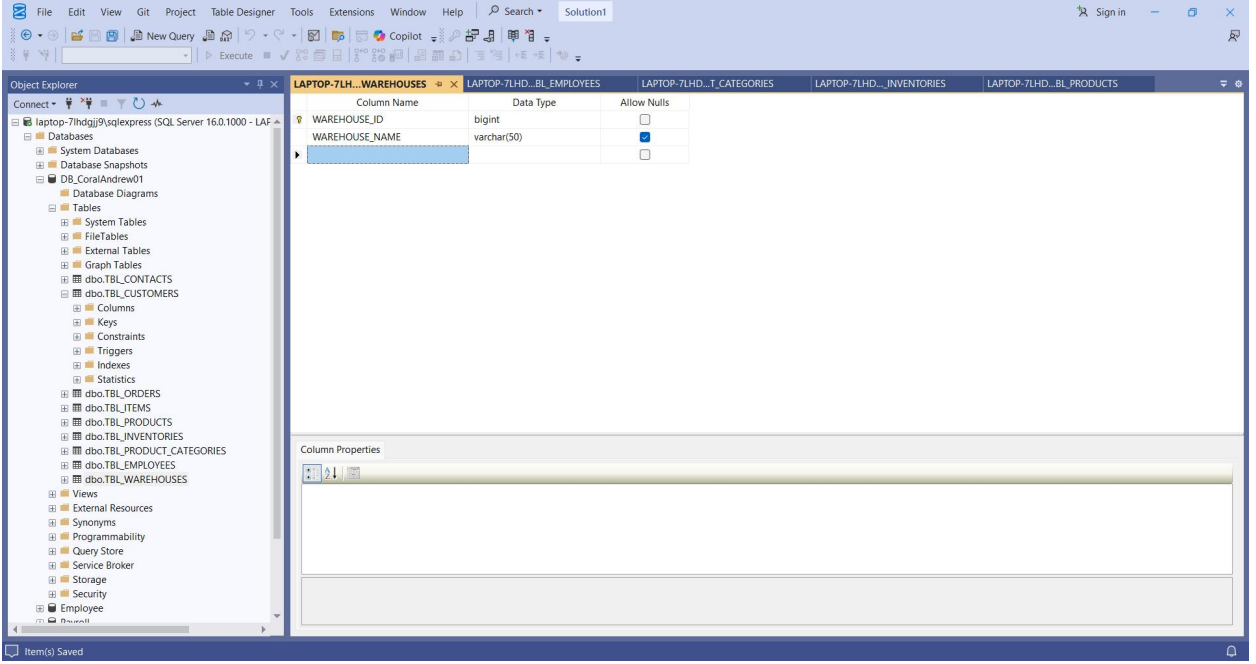

TBL_CATEGORIES

TBL EMPLOYEES

TBL WAREHOUSES

-----CONTINUE-----

12. Create a new database diagram and add all the tables.
